

## BACK-UP BATTERY - 520T WIRING:

BLACK: To (-) Chassis Ground, MUST BE SECURE!

BLUE: To alarm instant trigger circuit. Will trigger when battery is disconnected.

RED: To vehicle's fused constant (+) 12V ((+) power input from vehicle).

GREY: To Alarm Power input (power output to alarm power input).

DO NOT connect vehicle's (+) 12V to alarm, use only the GREY wire of 520T.
